

Agricorp Invest S.A. acquires majority participation in Bonum

Agricorp Invest S.A., via its wholly owned subsidiary Agri Food Invest Luxembourg which operates and develops agricultural and food projects in Africa, Europe and Asia, is pleased to announce a diversification of its portfolio by investing into Bonum, a company based in Skopje and near Kumanovo, in the Republic of Macedonia.

Founded in 1992, Bonum is a privately owned company whose core business is production and processing of champignons, as well as processed vegetables. Bonum's team of agri business experts persistently works on new product development, maintaining the highest quality of the products and of the manufacturing practices.

The strategic rationale behind this investment is to increase in Bonum production and employment.

The company plans to create additional jobs, full-time as well as seasonal. Depending on market developments, the number could reach from a few dozen to about a hundred, by the end of next year.
